Notice to Subscribers

Beginning in 1968, in its fifth year of publication, *Reading Improvement* changes from a quarterly journal to a tri-quarterly, published three times per year on April 20, September 20 and December 20. This change is made for the convenience of subscribers, who generally wish to receive their issues during the regular school year. The change will also make it possible to publish not only better quality material, as this becomes available, but more of it.

Under the new schedule, all of the issues of each volume will be published during the calendar year. The final issue of the year will come out in December, along with an index of the materials that were published during the year.
